

CAPABILITY STATEMENT

Openshore Pty Ltd provides underground service installations using a complete range of trenchless and conventional construction techniques. We love a challenge and are well known throughout the industry for our innovative solutions to complex issues and ability to deliver quality results. Our experience with telecommunications, water, gas, electricity, sewer and various other services include single pipe to multiple configuration installs in all ground conditions including rock. We provide solutions for Government departments, local Councils, commercial organisations, the private sector and all major infrastructure companies throughout Australia. We value our team and invest in ensuring they are qualified and competent to provide the highest level of service through continued training and valuable experience.
